

SAYALI MORE

Data Analyst

Pune, India | +91 9022536997 | Sayalimore2003@gmail.com | linkedin.com/in/sayali-more12 | github.com/SayaliMore03

SUMMARY

Data Analyst with hands-on experience in Python, SQL, Power BI, Excel, and machine learning. Skilled in data cleaning, data analysis, exploratory data analysis (EDA), ETL, dashboard development, data visualization, predictive modeling, and KPI reporting. Experienced in analyzing and transforming datasets of 50,000+ records into actionable business insights using Power BI, SQL, Python, Power Query, and DAX. Built interactive dashboards, developed machine learning models, automated data workflows, and applied data modeling, business intelligence, customer analytics, and statistical analysis to support data-driven decision-making across sales and finance.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, R, JavaScript

Data Analysis & Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib

Business Intelligence & Visualization: Power BI, DAX, Power Query, Microsoft Excel

Databases: MySQL

Development Tools: Git, GitHub, Jupyter Notebook, Google Colab

Core Skills: Data Cleaning, Data Analysis, Exploratory Data Analysis (EDA), ETL, Data Modeling, Data Visualization, Dashboard Development, KPI Reporting, Business Intelligence, Statistical Analysis, Predictive Modeling, Machine Learning, Customer Analytics

PROJECTS

Customer Churn Prediction & Analysis | *Python, Scikit-learn, MySQL, Streamlit*

- Analyzed **15,000+ telecom customer records** using **Python, SQL, and exploratory data analysis (EDA)** to identify customer behavior patterns and key churn drivers.
- Engineered features and developed **Logistic Regression** and **Random Forest** classification models, achieving **84% prediction accuracy** through predictive modeling and statistical analysis.
- Built and deployed an interactive **Streamlit** application to visualize at-risk customer segments, churn trends, and key performance metrics, enabling data-driven retention decisions.
- Proposed targeted retention strategies projected to reduce customer churn by approximately **18%** among high-risk customer cohorts.

Credit Card Transaction Insights Dashboard | *MySQL, Power Query, DAX, Power BI*

- Extracted, cleaned, and transformed **50,000+ credit card transaction records** using **SQL** and **Power Query** to support data analysis and business reporting.
- Designed interactive **Power BI** dashboards with **DAX** measures to monitor KPIs, spending trends, customer segmentation, and revenue performance.
- Identified the **top 5 spending categories** and a **15% Q3 revenue growth trend**, providing actionable insights for targeted marketing and business decision-making.

Vendor Sales Analysis | *Python, MySQL, Power BI*

- Built a **Python-based ETL pipeline** to clean, transform, and process **10,000+ vendor sales records** for analysis and reporting.
- Performed **exploratory data analysis (EDA)** using **Pandas** to identify seasonal demand patterns, sales trends, and top-performing vendors.
- Developed interactive **Power BI** dashboards highlighting vendors contributing **60% of total sales**, supporting inventory planning and procurement decisions.

AdventureWorks Sales Dashboard | *Excel, Power Query, DAX, Power BI*

- Integrated **7 CSV datasets (20,000+ rows)** using **Power Query** and developed a relational data model in **Power BI** for business reporting.
- Created **DAX measures** and interactive dashboards to analyze sales, profit margin, product performance, and key business KPIs.
- Identified **Accessories** as the highest-margin product category (**25% higher margin**), uncovering cross-selling opportunities through data-driven analysis.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science

MIT College of Engineering, Chhatrapati Sambhajinagar | Nov 2022 – July 2026

CGPA: 9.33/10

CERTIFICATIONS

- Microsoft Power BI Data Analyst Professional Certificate** – Coursera
- AI Foundations Associate** – Oracle
- Excel Basics for Data Analysis** – Coursera
- Data Science with Python** – Udemy
